

CONNELLY DRILLING SAFETY TEAMS

New Hire Training Rules

1. Wear PPE when required.
2. The drill site is often an active environment where many threatening hazards are present. Always be aware of your surrounding area.
3. Do not speed in company vehicle. Maintain safe distance and yield to other vehicles. Take your time and do not rush when driving.
4. Do not touch augers when they are rotating.
5. Beware of pinch/connection points on drill rig.
6. Maintain good housekeeping on the job site. Always put something back from where you got it. Poor housekeeping results in trips/falls.

These rules are the responsibility of the driller who the new hire has been assigned to ensure they are informed of the hazards they will face.
